Random disconnections, cannot delete NetworkProfile - [Solved]  
2019/08/29

I have this TL-WN781ND adapter which I got since 2016 but It has this problem that it randomly disconnects itself from the internet, sometimes with an exclamation mark, showing a 1-bar or showing full-bar (even if its not working)I made a bat file with this code:echo offclsipconfig /releaseipconfig /renewipconfig /registerdnsexitI also ticked connect automatically on my internet but that doesnt seem to workI reinstalled drivers too.Another problem of mine is I have 2 internet profiles, 1 named as my original internet and the other as NetworkProfile that always reappears everytime I delete it.Sorry for my punctuation mark and grammar errors but I just really want to fix this it's been a year.
